PLACCHE DI COMANDO

PUSH PLATES

Storicamente un mero elemento funzionale, la placca di comando è oggi un importante dettaglio estetico all'interno dell'ambiente bagno.

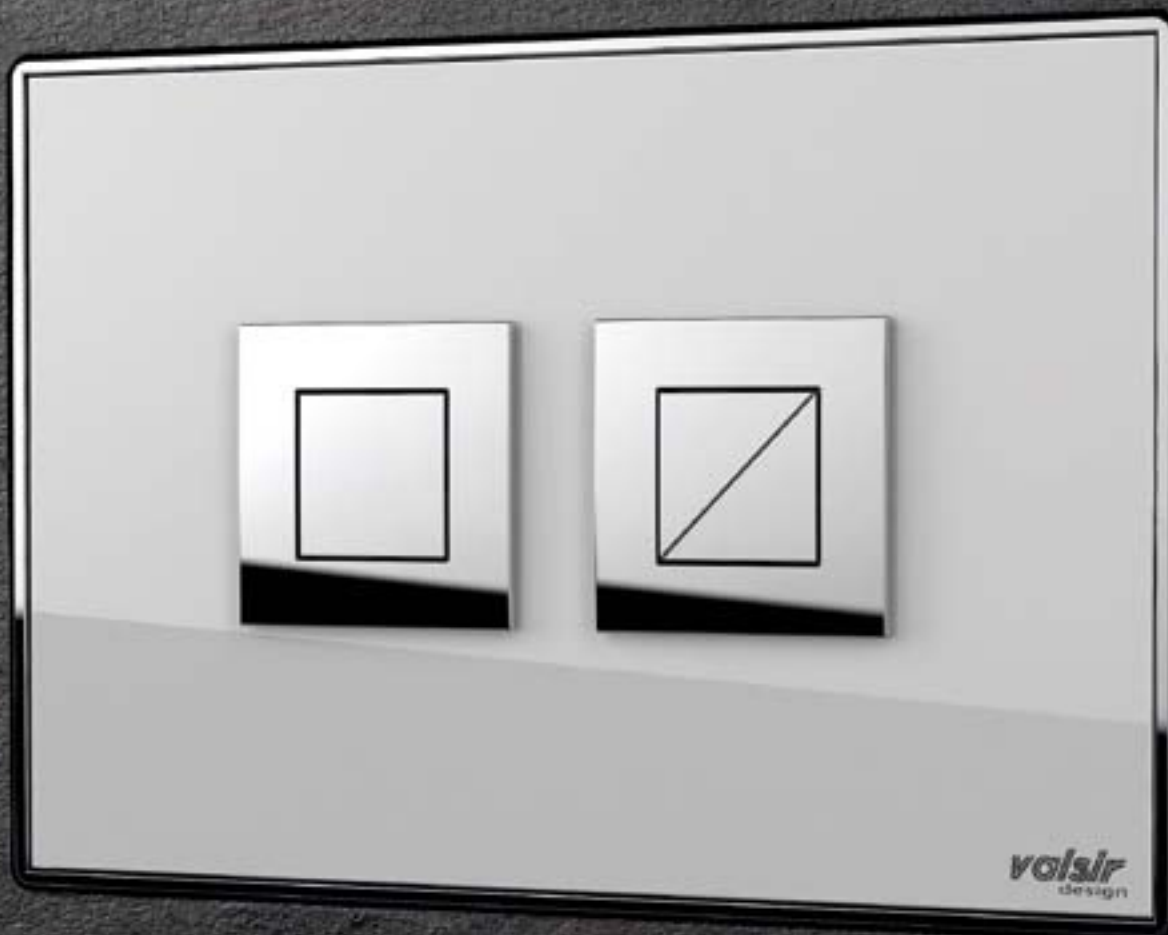

La tecnica, coniugata al design, dà origine alla proposta Valsir: un'ampia scelta di placche che rappresentano l'ultima tendenza nell'arredo del locale bagno.

Traditionally only a functional element, the push plate is now an important aesthetic detail in the bathroom. Combined with design, technology gives rise to the Valsir proposal: a wide choice of plates representing the latest trend in the bathroom.

FEEL

PLACCA A FILO PARETE

PLATE FLUSH TO THE WALL

Linearità assoluta in bagno con Feel, il sistema che permette di installare a filo parete le placche Valsir Design.

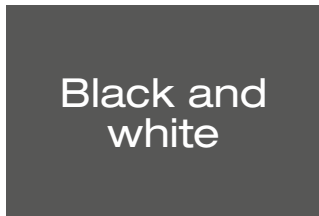

Feel è la soluzione elegante e raffinata dal design rigoroso e lineare.

Absolute linearity in the bathroom with Feel, the system allowing the Valsir Design push plates to be installed flush to the wall.

Feel is the elegant solution characterized by a smooth and linear design.

ARIAPUR LA SOLUZIONE CONTRO I CATTIVI ODORI

THE SOLUTION TO FOUL ODOURS

Ariapur è la soluzione per assicurare l'eliminazione di odori sgradevoli garantendo aria pulita all'interno dell'ambiente bagno.

Ariapur cattura gli odori direttamente dal vaso WC, aspirandoli ed eliminandoli prima che si diffondano.

Allo stesso tempo elimina il vapore generato durante l'utilizzo di docce e vasche attraverso il sistema di ventilazione della placca aspirante.

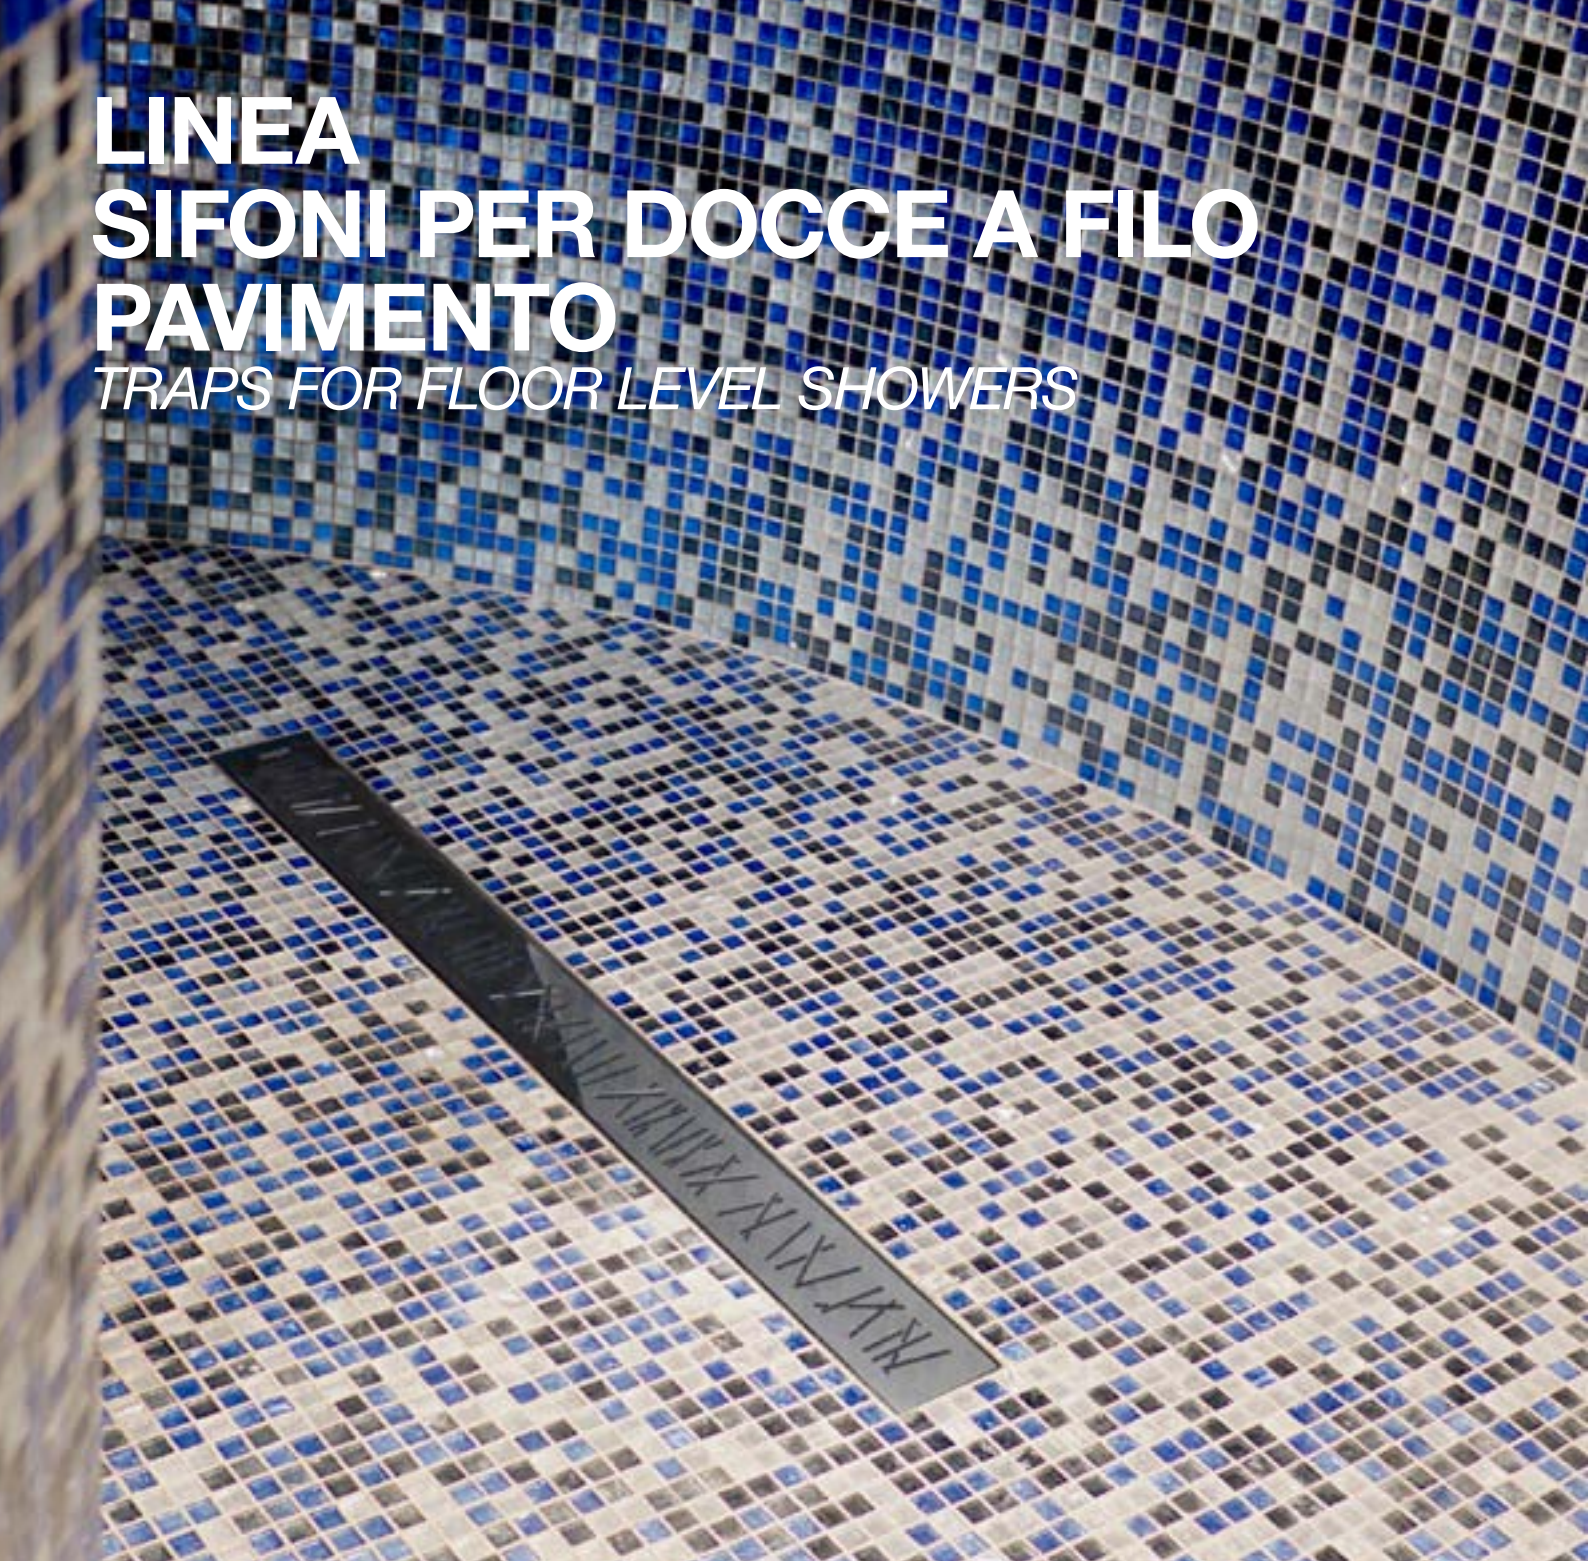

Ariapur is the solution that guarantees the elimination of unpleasant smells thus ensuring clean air inside the bathroom.

Ariapur captures odours directly in the WC pan, extracts, and eliminates them before they spread.

At the same time, it eliminates the vapour generated during use of the shower and bathtub through the ventilation system of the extractor plate.

LINEA SIFONI PER DOCCE A FILO PAVIMENTO

TRAPS FOR FLOOR LEVEL SHOWERS

Sifoni per docce a filo pavimento con un'ampia gamma di griglie in diverse misure per realizzare docce a filo pavimento minimal e di design.

Traps for floor level showers with a wide range of grids in various lengths to create minimal design floor level showers.

MFV

IL NUOVO MODO DI COSTRUIRE

A NEW CONSTRUCTION TECHNIQUE

Il sistema MFV permette l'installazione di pareti portanti leggere e di spazi divisori, per la ristrutturazione o la realizzazione di bagni ex-novo in modo facile, veloce, sicuro ed economico rispetto alle tradizionali ristrutturazioni con opere murarie.

The MFV system allows the installation of light load-bearing walls and partition spaces, for the renovation of existing bathrooms or the creation of completely new bathrooms easily, rapidly and economically as compared to traditional renovations involving construction works.
